
Internet and Computing Core Certification (IC3)

What is IC³?

The Internet and Computing Core Certification (IC³) program is the world's first validated, standards-based training and certification program for basic computing and Internet knowledge and skills. Successful completion of IC³ ensures you have the knowledge and skills required for basic use of computer hardware, software, networks, and the Internet.

IC³ is your gateway to advancement in education, employment, or other certification programs.

IC³ certification is based on successfully passing three exams:

- Computing Fundamentals
- Key Applications
- Living Online

Who should consider IC³ certification?

IC³ is the ideal starting point for anyone interested in learning computer and Internet basics. The program gives individuals sufficient Internet and computing literacy skills to enter current job markets or begin higher education programs. Prime candidates for IC³ are junior high and middle school students, high school students, GED students, continuing education students, Job Corps participants, employees who use technology on the job, and anyone—young or old—who wants to gain a working knowledge of computers and the Internet. Even if one chooses not to become IC³ Certified, IC³ Training is an excellent way to learn essential fundamental computer concepts.

What are the benefits of IC³?

Global, broad-based IC³ Certification verifies that candidates possess the accepted standard level of basic computer and Internet literacy and are more efficient and marketable. Successful completion of IC³

- Provides core skills and knowledge necessary to use some computer applications and the Internet
- Effectively tests computing knowledge and skills to ensure mastery is achieved
- Gives a resume-building standard certification as proof of successful completion of the program
- Provides the foundation necessary to further enhance productivity and marketability with other desktop application-specific certifications
- Gives individuals confidence and security in being part of today's "digital world"
