

How do you validate computer skills competency?

The answer is *Internet and Computing Core Certification (IC³)*! And the *RAA Web-Based IC³ Training Solution* can help you prepare!

IC³ is the first globally recognized, standards-based certification program for basic computing and Internet knowledge. Becoming IC³ certified is the ideal starting point for individuals looking to prove their computer skills, or organizations looking to validate skills across their entire organization.

The RAA Web-Based IC³ Training Solution is the first approved online training course for IC³ study!* We use audio narration, interactive exercises, simulations, tips, graphics, and video clips to present training that is easy-to-use and enjoyable. The course is self-paced, allowing learners to progress at their own speed and review lessons as often as required to become proficient and comfortable with the concepts and tasks presented.

The RAA Web-Based IC³ Training Solution provides training for all three *Internet and Computing Core Certification* exams:

Computing Fundamentals - Covers basic elements dealing with computer hardware and software, such as how hardware and software work together and how to use operating systems.

Living Online - Covers various elements related to Web browsers, the Internet, electronic mail, and networking fundamentals, as well as the impact of computing and the Internet on society.

Key Applications - Covers general word processing and spreadsheet tasks, as well as common application functions, such as formatting, editing, managing and printing files, and utilizing help.

Prove that your staff is a step ahead of technology with the RAA Web-Based IC³ Training Solution! Contact RAA Training for a free demo and more
